Jackpile-Paguate EIS

March 26, 1983

Mr. Vincenti Pedro, Sr.
Governor
Pueblo of Laguna
P.O. Box 194
Laguna, New Mexico 87026

Confidential Claim Retracted

Authorized by: SC

Date: 6/25/13

Dear Governor Pedro:

In response to the telephone conversation of March 23, 1984, between Mike Pool (EIS Team Leader) and Ron Solimon the enclosed documents are for your review and comment. Section J (Radiation) describes the affected environment while Section G (Radiological Impacts) describes the predicted radiological impacts under the various reclamation alternatives being addressed in the Jackpile-Paguate EIS. Both sections were derived from a previous report prepared by Argonne National Laboratory entitled "Radiological Impacts of the Jackpile-Paguate Uranium Mine - An Analysis of Alternatives of Decommissioning" (ANL/ES-131).

To ensure that the radiological reclamation proposals are technically complete and accurate, copies of the enclosed material have also been routed to selected specialists in BLM, BIA and the Environmental Protection Agency. All reviewers have been requested to submit their comments by April 6, 1984, in order to expedite completion of the preliminary draft EIS.

If you have any questions or concerns regarding this information, please telephone Mike Pool at (505) 766-3114 or FTS 474-3114.

Sincerely

Herrick E. Hanks
Rio Puerco Resource Area
Manager
